

REACH Compliance Statement

The European Union regulation EC 1907/2006 which covers the Registration, Evaluation, Authorization and Restriction of Chemical substances is a regulation that became effective on June 1, 2007. The purpose of this legislation is to ensure human and environmental health by regulating *Substances of Very High Concern*, or SVHCs. These substances are listed in the REACH legislation.

Vyrian is a downstream user of SVHC substances, and does not distribute parts to our customers that have SVHC in the prohibited concentrations outlined in the legislation. We do not produce or distribute chemical substances requiring registration or raw materials in any form. Given our low-risk relationship with SVHCs, Vyrian is not required under REACH to distribute Safety Data Sheets or Exposure Scenarios to our end users.

Vyrian will continue to monitor our suppliers for compliance with REACH legislation.

For more information on current REACH legislation, please visit:
